1) hereto or 2) to Paper No./Mail Date  (b) including changes required by the attached Examiner's Amendment / Comment or in the Office action of Paper No./Mail Date  Identifying indicia such as the application number (see 37 CFR 1.84(c)) should be written on the drawings in the front (not the back) of each sheet. Replacement sheet(s) should be labeled as such in the header according to 37 CFR 1.121(d).		
6. DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.		
Attachment(s)  1. Notice of References Cited (PTO-892)  2. Notice of Draftperson's Patent Drawing Review (PTO-948)  3. Information Disclosure Statements (PTO-1449 or PTO/SB/O Paper No./Mail Date	6.  Interview Summary Paper No./Mail Dat 8), 7.  Examiner's Amendn 8.  Examiner's Stateme 9.  Other	e

## **DETAILED ACTION**

## Allowable Subject Matter

Claims 3, 5, 7-11, 14, 16, 18-22, 25, 27, 29-33, 35, 37, 39, 41, 43, and 45-60 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 3, 14, and 25 refer to an apparatus, method and computer program product for blind separation of an overcomplete set of mixed signals, respectively. The prior art of record does not disclose, nor would it suggest to one of ordinary skill in the art, the limitation of adjusting the clustering of the mixed signal samples and parameters of the geometric constraint.

Claims 5, 16, and 27 refer to an apparatus, method and computer program product for blind separation of an overcomplete set of mixed signals, respectively. The examiner agrees that it would not have been obvious to one of ordinary skill in the art to modify Bofill et al. to jointly optimize the matrixes S and A in the presence of noise, as there is no indication as to how to find a solution for the case in which noise is present in Bofill et al.

Claims 35, 37, 39, 41, 43, and 45 refer to apparatus, method and computer program product for the determination of a CR bound for both an estimated mixing matrix A and a estimated signal matrix S. The prior art of record does not disclose, nor

Art Unit: 2655

would it suggest to one of ordinary skill in the art in the recited combination, a parameter  $\lambda_k^2$  which is developed from a log likelihood function depending on a representation of the source signal S.

New claims 46-60 further limit allowed claims 5, 16, and 27, and thus are also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian L. Albertalli whose telephone number is (571) 272-7616. The examiner can normally be reached on Mon - Fri, 8:00 AM - 5:30 PM, every second Fri off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wayne Young can be reached on (571) 272-7582. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Application/Control Number: 10/007,322
